✦ AI Overview

[Learn more](#)

Hydrofriction refers to a process that involves the use of a working fluid as an elastic body in a hydraulic damper. This can improve the damper's efficiency, reliability, and durability. [↗](#)

Hydrofriction can be used in a variety of applications, including: [↗](#)

Locomotives

Upgrading the hydraulic dampers in locomotives can improve their reliability and extend their useful life. [↗](#)

Electric trains

A numerical algorithm can be used to study the bending vibrations of a hydro-friction damper in a disk-type electric train. [↗](#)

Centrifuges

A hydrofriction coupling can be used to accelerate the rotor of a centrifuge. [↗](#)

Hydrofriction coupling for centrifuges homing devices

Download Citation | Hydrofriction coupling for centrifuges homing devices | A centrifuge is not loaded at the start period,...
